Horror House - Sound Pack

CONTENTS:

- 500+ unique royalty-free sound effects in .WAV format (44.1kHz, 16-bit)
- Includes categorized folders: Ambiences, Character, Doors Gates Openables, Footsteps, Item Interactions Destructibles, Kitchen, Miscellaneous, Monster Enemies, Music Mood, UI, and Weapons.

LICENSE:

Royalty-free. You can use these sounds in commercial or non-commercial games and interactive projects. Redistribution or reselling of the sound files as standalone content is not allowed.

HOW TO USE LOOPABLE SOUNDS:

Some continuous sounds in this pack—like wind, ambient drones, or fridge motors—are designed to loop naturally and do not start at 0 volume. This is intentional to preserve their seamless flow.

To avoid unnatural playback, don't trigger these sounds abruptly at full volume. Instead, use a script to gradually fade them in from 0 to the intended level, and fade them out the same way when stopping. These sounds are meant to run continuously in the background, not to be triggered like one-shot effects. This approach helps maintain immersion and prevents jarring transitions in your game.

FOR UNREAL ENGINE USERS:

Includes ready-to-use Sound Cues (.uasset) created in Unreal Engine 5.6 for quick integration. The pack is organized into two folders: "Wav" containing original audio files and "Cues" includes matching Sound Cues as .uasset files.

Note: .uasset files are compatible only with UE 5.6 or newer. For older versions, import the .wav files manually and create your own Sound Cues.

By default, Unreal Engine uses Blink Audio compression, which can noticeably reduce sound quality. For better results, it's highly recommended to switch to Opus compression.

Some loopable files may produce clicks or pops noises when looping, caused by the audio compression formats used in UE. If this occurs, set the compression type to PCM (uncompressed) for that file. The following sounds are already set to PCM in the pack: Music_Ambience_Dark_MonsterWhispers_Loopable; Ambience_Eerie_Distant_Wind_Loopable
